

X-RayMAX™ (Australia) - Data Sheet

X-RayMAX™ is a supplement designed to help prevent developmental bone issues in foals. In an Australian field trial the unique VCAL calcium technology has been shown to help correct bone development with minimal problems visible by X-Ray.

Experience in working and racing horses suggest there will also be conception rate benefits to.

Please note – this is NOT a calcium supplement it is a CHELATED calcium supplement. It does NOT give up its calcium to the bones but our research suggests that it helps with the management of calcium in all the cells in the bones as well as other cells all over the body.

For best results feed 5 days a week to in foal and lactating mares.

Recommended Feeding Rate:

For a 550 kg horse	Quantity to feed
Empty and pregnant mares	1/3 rd of a scoop approx. 20g, 5 days a week
Mares with growing foals	1/3 rd to 1/2 scoop approx. 20-30g, 5 days a week

One 80ml scoop is approx. 60gms

Application: Do NOT feed seven days a week.

Active Ingredients:

Ingredient	Spec per kg	Spec per 20g
Calcium*	200g	4g
